

FCC:

Why are you trying to limit the satellite radio services when you've already so successfully limited me over the air choices by letting a few corporations control all of the free airwaves?

Why would you limit satellite radio from broadcasting traffic and weather when it's perfectly fine for satellite TV to broadcast all kinds of porn and horrific violence?

The FCC's rules have screwed up free radio and TV beyond belief. Keep your hands off satellite radio!!!

Then perhaps we can revisit the your station ownership rules...

Yours,

Brent Carpenter
